## Response to Amendment

The amendment filed on 7/9/2004 under 37 CFR 1.312 has been entered. Claims 12, 18, and 21 have been amended and are presented for further examination. New claim 29 is added. Claims 13 has been cancelled. Claims 12 and 14-29 are presented.

## Allowable Subject Matter

Claims 12, 21, and 29 are allowed.

Pursuant to 37 C.F.R. 1.104(e) and MPEP 1302.14, the following is an examiner's statement of reasons for allowance: In considering Applicant arguments submitted 7/9/2004 are considered persuasive especially considering pages 14-16 were in the prior arts of record do not teach a direct multimedia communication system wherein web server including a message server having CGI interface using HTTP to allow plurality of client application programs on a distributed network to communicate with each other in a semi-real time chat by interlocking with HTTP; wherein the client application program also transmits and receives multimedia contents by consistently accessing and communicating with web server by HTTP in order to display multimedia contents and chat in the same window without activating a browser.

Claims 21 and 29 are allowed because they recite similar limitations to claim 12 and therefore are allowed on the same basis.

Claims 14-20 and 22-28 depend on claims 12 and 21, respectively and therefore are considered allowable on the same basis as the independent claim as well as for the further limitations set forth.

The Examiner considers the applicants' claims 12 and 14-29 to be allowable based on the claim interpretation and the aforesaid prior arts of record.

Application/Control Number: 09/530,954

Art Unit: 2153
